How to setup WHS Mobile on your Windows Home Server

Windows Home Server

Initial Configuration

1. Install the Add-In via the Home Server Console.
2. Port forward 8169 TCP using your router's configuration tool.
3. Log back into the Console.
4. Click the Settings button at the top right corner of the Console.
5. Scroll down and click WHS Mobile on the left hand side.
6. Select a user from the dropdown box.
7. Check the features you want the user to have access to.
8. Go back to step 5 if you want to allow more than one user access to WHS Mobile.

Share Navigation

- Click an item in the list to navigate.
- If the item is a file, you will get a popup with options (Rename, Delete, etc.).
- Tap the options button to get a popup of commands for that directory (Upload, Upload from Camera, Refresh, etc.)

Media Streaming

To stream music (mp3 only):

1. Navigate to a folder with music
2. To stream a single file, tap the file and then tap "Play".
3. To stream all the files in the folder, tap "Options" and then tap "Play Album".

To view an image:

1. Navigate to the file, tap it, and then tap "View".

Uploading a Photo

Uploading from the camera:

1. While in a folder/share tap "Options".
2. Tap "Upload from Camera".
3. Take a photo and select it for use.
4. Then enter in a name for the photo (without extension).
5. Tap "OK".
6. Wait for the view to refresh.

Uploading from a photo library:

1. While in a folder/share tap "Options".
2. Tap "Upload".
3. Select an image.
4. Then enter in a name for the photo (without extension).
5. Tap "OK".
6. Wait for the view to refresh.

Document Viewing

With WHS Mobile v1.5.3 you can view .doc, .xls, .pdf, and .htm/.html.

1. Navigate to the file.
2. Tap it.
3. Tap "View".

You can then use the pinch gesture to zoom in and out.

User Management

Disabling and enabling a user:

1. In the users view, tap a user.
2. Tap enable/disable (already enabled if there is a checkmark to the right of it).

Removing a user (keeps their share data):

1. In the users view, tap a user.
2. Tap "Remove".

UPnP TCP Port Management

Adding a TCP port forward:

1. In the UPnP view, tap the "Options" button.
2. Tap "Add".
3. Enter a port number into the popup.
4. Click "OK".
5. Wait for the view to refresh.

Removing a TCP port forward:

1. Tap a port in the TCP list
2. Tap "Remove".
3. Wait for the view to refresh.
